Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application has been examined. This application is a continuation-in-part (C-I-P) of serial number 10/411,936 filed April 11, 2003. An informational disclosure statement filed July 22, 2003, has been considered. Applicant is asked to maintain a clear of demarcation between the subject matter of the instant application and serial number 10/411,103. Claims 1-19 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 7, 9-15, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Powell et al. in particular see Figure 4 in which a “water box” 96 is enclosed (“kit” elements 94 100) and includes “...a source of warm air (via conduit 106)to form a protective barrier of warm air in the protective plenum...”.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3753

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 3-6, 8, 16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powell et al in view of Botsolas (5,158,114). Powell et al discloses the claimed invention except for the recitation "adhesive tape" to "attach the "structure" and fiber reinforced insulation as taught by Figure 6 and adhesive tape 14 of Botsolas. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the "protective plenum" of Powell et al, as taught by Botsolas in order to provide more effective freeze prevention and ease of assembly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular note the patents Treub et and Gibbs.
